#### I. Introduction

The Rocky Mountain Area Coordination Center serves 10 dispatch centers in Colorado, Kansas, Nebraska, South Dakota, and Wyoming. On an ongoing basis, this Geographic Area Coordination Center (GACC) and RMACG Duty Officer coordinates the priority setting and allocation of resources for fire management within the Rocky Mountain Area in the most cost effective and efficient manner. When the number or complexity of fire management activities and competition for resources increases significantly within the Area and/or on a national scale, the Rocky Mountain Multi-Agency Coordinating (MAC) Group may be activated.

#### A. Mission Statement

The Rocky Mountain MAC Group is formed in order to set priorities for incidents and / or Area Commands, and to direct, control, allocate and reallocate resources among or between Area Commands and Incident Management Teams when the character and intensity of the fire management situation significantly impacts the geographic area.

### B. MAC Membership

The MAC Group is comprised of managers representing the various agencies within the Rocky Mountain Geographic Area. Typically, this would include representation at the Regional Director/Fire Director level for the U.S. Forest Service, Fire Management Officer level for State agencies, State Fire Management Officer level for the Bureau of Land Management, and Regional Fire Management Officer level for the National Park Service, Bureau of Indian Affairs and U.S. Fish and Wildlife Service.

Members must be delegated in writing the authority to represent and make commitments on behalf of their agency. A list of current members and advisors is included in Appendix A of this plan.

Other organizations may be invited to participate if the MAC Group agencies feel that their participation would improve the incident prioritization and resource allocation process.

If there is disagreement on attendance of a particular organization, the MAC Group will go into an executive section prior to the MAC meeting to resolve.

### **Local MAC Membership**

Local MAC (LMAC) is composed of local Agency Administrators, Fire Management Officers, Dispatch Center Managers (and others as defined in the zone's operating guides) and a RMCG liaison within the zone.

### II. Operating Procedures

### A. MAC Group Activation

At Preparedness Levels below III, the Rocky Mountain Coordinating Group has a rotating Duty Officer that serves to assist the RMACG Center Manager to prioritize incidents and facilitate Inter-Agency business on an as needed basis.

At Preparedness Level III, the Rocky Mountain Coordinating Group Duty Officer and Geographic Area Coordination Center Manager will discuss and consider the need to activate the MAC Group. The decision to activate the MAC Group will be based on the number of large/complex/IMT incidents, fires managed for resource benefit, prescribed burns scheduled, predicted weather, percentage of area crews and initial attack resources committed, and the level of competition for resources between units and/or Geographic Areas.

The Rocky Mountain Coordinating Group and the Geographic Area Coordination Center Manager will also decide where the MAC Group should be physically located. The MAC Group will usually be located in the Coordination Center but can be located where fire activity is the most severe. MAC Group business may also be addressed via conference calls. Once activated, the MAC Group may determine to reposition itself.

### **LMAC Group Activation**

LMAC for the 10 interagency dispatch centers will convene when duty officer and center manager determine the need to activate agency LMAC members based on activity, and as defined in the zone's operating guides.

### B. Roles and Responsibilities

The MAC Group does not direct the Incident or Area Command(s), who retain the authority and responsibility for on-the-ground management of the incident organization.

The roles and responsibilities of these Rocky Mountain agency MAC representatives are as follows:

- 1. Prioritize fire management incidents.
- 2. Provide guidance on the allocation or re-allocation of scarce/limited resources among incidents to assure safe, productive, wildland fire management activities commensurate with the priorities identified. The MAC group at times may directly re-allocate scarce/limited resources
- 3. Interact with LMAC Groups to assess priorities for resource allocation, and with the national level MAC Group to support the Area's resource needs through RMACC or the MAC Coordinator. (Appendix F)

The following are other items that may be appropriate to address within the framework of the MAC group. These issues include but are not limited to:

- 1. Anticipate future resource needs.
- 2. Review policies/agreements for resource allocation.
- 3. Recommend staffing extension guidelines for available resources.
- 4. Review the need for involvement by other agencies.
- 5. Determine the need for activation of national military resources.
- 6. Determine the need for and designate location(s) of mobilization and demobilization centers.
- 7. Provide information and perspective to agencies wishing to manage an incident for multiple benefits as indicated on the go/no-go checklist.
- 8. Provide disaster coordination at the State and Federal levels.
- 9. Improve political interfaces.

### C. Support Organization

### 1. MAC Group Coordinator

Initially, the duties of the MAC Coordinator are carried out by the Rocky Mountain Center Manager and/or the Duty Officer. If desired, a qualified MAC Coordinator may be brought in to relieve this workload. The MAC Coordinator's roles and responsibilities are as follows:

- Coordinates with the Rocky Mountain Center Manger to assure that required information is being provided to the MAC Group within the time frames specified.
- b. Arrange for and manage the facilities and equipment necessary to carry out the MAC Group functions.
- c. Assists the MAC Group decision process by facilitating the group's conference calls and/or meetings. MAC Group Coordinator may also be asked to facilitate RMCG issue discussions following completion of prioritization and allocation.
- d. Documents the MAC Group's decisions and coordinates with the Rocky Mountain Center Manager to assure their prompt implementation.

Once MAC is activated the MAC Coordinator will contact the Rocky Mountain Center Manager to arrange the initial staffing to support the MAC Function. These resources will be tracked on a RMA MAC support order.

The MAC Coordinator will also reserve a meeting room for daily meetings and operational briefings.

The MAC Coordinator will receive a delegation of authority from the chair of the RMCG.

### 2. GACC Intelligence Coordinators

In order to support the MAC Group's requirements that situation, resource status, and fire behavior information is accurate and current, the GACC Predictive Services Sections will expand as needed. This may involve splitting the function

into separate Situation, Resource and Fire Behavior Units under the Center Managers direction, or bringing in additional personnel within the existing organization.

All information will be collected via existing dispatch/coordination channels by the GACC Predictive Services Sections, and given to the MAC Coordinator for consolidation and presentation to the MAC Group. Unless constrained by extremely tight time frames, any requests for information in addition to the required products listed below will flow back down through the MAC Coordinator to the Center Manager for collection. Conversely, the MAC Group will keep the Center Manager informed of any individually collected information.

The RMCG may task the MAC Coordinator with other responsibilities. This could include the supervision of the Information function, public information and education, coordination with FAST teams, etc. Any further responsibilities will be added to the MAC Coordinators delegation of authority.

### 3. MAC Support Organization

The complexity of the total fire situation will guide the staffing utilized and supervised by the MAC Coordinator. At a minimum the MAC Coordinator should ensure there is adequate staffing to maintain the status summary for MAC meetings, capture MAC decisions and prepare the documentation package for the MAC. Several positions utilized in the past include MAC Plans, MAC documentation, MAC Operations, MAC Aviation, Information/External Affairs, Safety Coordinator, and Situation/GIS support. Job aids have been developed and are included at the end of the MAC Master Guidance document that provide information on the mission of each function, how to ramp up to meet the needs of the MAC, daily operations schedules, descriptions of special activities that have occurred in the past, and guidance on when and how to scale down the function. A brief description of responsibilities follows:

- a. MAC Plans The primary functions of MAC plans include maintaining the status summary for current project fires requiring prioritization, provide administrative support to the MAC coordinator and group, provide maps of incidents for MAC support, and to maintain the MAC group documentation package. As conditions warrant additional personnel can be supervised by MAC Plans which could include a documentation unit leader, a situation unit leader and Decision Support Group (DSG).
- b. MAC Operations The primary function of MAC operations is to work with MAC Plans and the RMCC Center Manager to obtain the most current information on resource commitments, needs and availability and to then make recommendations to the MAC Group on how to allocate or re-allocate critical resources. The MAC Operations position is separate from the RMCG Operations Committee and the RMA Operations Tactical Group.
- c. MAC Aviation Coordinates with the RMCC Manager and MAC

Operations to evaluate intelligence information and make recommendations to the MAC group on the placement and allocation of resources. Works with all agencies to implement MAC decisions. Works with MAC Safety and IMT aviation to provide aviation safety teams where needed.

d. MAC Safety – The primary function of the MAC Safety position is to monitor the overall safety situation for the geographic area. MAC Safety also makes recommendations to the MAC Coordinator or the RMCG Chair on the activation of FAST, Aviation Safety Teams, etc. MAC Safety will serve as the point of contact for any teams activated and the MAC Coordinator or RMCG Chair.

### D. Intelligence Requirements

- 1. Resource status (available and committed) by agency (source SIT Report/other data bases).
- 2. Summary of outstanding resource requests and critical resource needs (source Incident Intelligence Summary and resource orders).
- 3. Resources coming available for reassignment from incidents approaching containment (source Demob Plans/Resource Availability Lists).
- 4. Incident status information:
  - a. Incident Intelligence Summary (ICS-209) for each incident.
  - b. Incident Information report for Geographic Area (source SIT Report).
  - c. Incident Action Plans and maps (if available).
  - e. Summary of updated information (by incident) collected from calls to Incident Management Teams, Fire Management Officers, Information Officers, etc.
  - f. GACC list of priorities.
- 5. Specialists may use any of the following when appropriate to determine an assessment of current/potential fuel situation and fire behavior predictions: (source RERAP, FARSITE, BEHAVE, NDVI Maps, NFDRS, Firefamily+ programs, etc.). The Decision Support Group (DSG) may be utilized to assist with the decision support technologies used to perform the analysis and development of a Decision Analysis Report (DAR).
- 6. Short and long-range weather forecasts (source National Weather Service).

### E. Meeting/Conference Call Protocol

A general briefing prior to the MAC Meeting will address the Rocky Mountain Area Situation Report, Fuels/Fire Behavior Assessment, and a weather briefing.

A checklist format to be used in taking roll for each call is included in Appendix B of this plan.

The agenda for MAC Group meetings/conference calls will be as follows:

- 1. Roll call
- 2. Incident Prioritization & Discussion
- 3. Allocate Resources
- 4. Document Decisions
- 5. Transmit Decisions to the Field
- 6. Evaluate the need to continue MAC

### F. Incident Prioritization

The first meeting of the MAC group will include development of the prioritization criteria by which incidents will be prioritized and scarce resources allocated for the duration of the MAC Function. Examples of criteria developed by past MAC Groups are listed in Appendix C. These examples are available to give the MAC Coordinator and the MAC Group members a starting point from which to negotiate prioritization criteria acceptable to all members of the group. Also included in Appendix C is the Priority Decision Matrix.

### G. MAC Group Products

The flow of information regarding MAC Group decisions is from the MAC Coordinator through the dispatch/coordination system or through individual members to their agencies for implementation by the Center Manager.

On a daily basis, the MAC Group can be expected to issue an Incident Situation Summary that will provide a short overview of the situation within the Rocky Mountain. When the GACC is experiencing numerous complex fires the Decision Plus Criteria Matrix may be used to document the priorities of the fires.

- 1. Prioritized list of fires and additional resources to be assigned (as they become available). A blank form is included in this plan as Appendix D.
- 2. Any other work products produced will be those specifically assigned to the MAC Coordinator by the RMCG. These could include:
  - a. Double-crew helicopters, engines, and/or water tenders.
  - b. Solicit list of available contract resources.
  - c. Activate Aviation Safety Teams.
  - d. Activate portable FAA Tower operations.
  - f. Change pilot duty limitations.
  - g. Require adequate notice before release/reassignment of resources (minimum of 48 hours).
  - h. Train local workforce and/or hire more AD fire crews.
  - i. Bring in ADO payment teams.
  - Maintain supporting documentation.

This section left blank intentionally, see following page.

### APPENDIX C

### PRIORITIZATION CRITERIA

### **National and RMA MAC Priorities**

When competition for wildland fire resources occurs among Geographic Areas, the National Multi-Agency Coordination Group (NMAC) at NIFC will establish national priorities and confirm drawdown levels.

When requested, Geographic Areas will establish priorities for their incidents and wildland fires and report them to NICC.

The single overriding suppression priority is the protection of human life – both, that of our firefighters and of the public.

In setting national priorities and drawdown levels, the following criteria will be considered:

- II. Protecting communities and community infrastructure, other property and improvements, and natural and cultural resources.
- III. Maintaining initial action capability.
- IV. Limiting costs without compromising safety.
- V. Meeting agency suppression objectives.
- VI. Support to National Response Framework (NRF) taskings.

Refer to RMA Mob Guide Chapter 30 for additional considerations for incident prioritization.

### **Priority Decision Matrix (6/2011)**

| Element  Firefighter Safety  Firefighter Safety  Si e O a   Public Safety  E C C a a a r r   Objectives  Objectives  Objectives  Duration of Resource Commitment  Improvements to be Protected  N  S  W   | Value of 1  Low exposure with simple hazards easily migrated. One or no aircraft assigned.  Exposure to hazard can be mitigated through public contact. No known air quality violations at sensitive receptors.  Objectives are difficult to achieve. Several conflicts between objectives and constraints exist.  Eight Days | Selective Holding Value of 3  Moderate exposure with several hazardous conditions mitigated through the LCES worksheet.  Public must be managed to limit hazard exposure. Air quality is degraded and approaches NAAQ violation thresholds.  Objectives are moderately difficult to achieve. | Value of 5  High exposure which requires multiple strategies to mitigate hazards. Multiple aircraft types assigned.  Closures of highways and evacuations likely. Air quality at sensitive receptors violates NAAQs. Public exposure to hazard is imminent. ### **APPENDIX F**

### Sample Delegation of Authority

**Delegation of Authority**Chair, Rocky Mountain Coordination Group

|    | 800 hours, June 4, 2003, I have delegated the following authorities to, who is ed as Multi-Agency Coordinating Group Coordinator for the Rocky Mountain Geographic Area.  |
|----|---|
| Ū  | Sign MAC decision documents that have been developed by the MAC Group.  |
|    | Re-prioritize or re-allocate resources as necessary between scheduled MAC meetings. Any re-   |
| 3. | prioritization or re-allocation will be presented to the MAC Group at the next scheduled meeting. Provide guidance to Public Information, Plans, Operations, Aviation, Prevention/Education Team and other MAC support functions as needed. |
| 4. | Assume responsibilities of RMCG Duty Officer as defined in Rocky Mountain Area Interagency Mobilization Guide, Chapter 10.  |
| 5. | Facilitate MAC Group meetings and conference calls.   |
| 6. | Coordinate with Local MAC Groups, including participation on conference calls whenever possible.  |
|    |   |
|    | Chair, RMCG   |
|    | Amendment to Delegation of Authority  |
| 7. | Serve as the point of contact for the FAST Team lead by representing the RMCG.  |
|    | Chair, RMCG   |
